Model "A" Tachometer

Fits 6V Positive Ground Cars

By Steve Pargeter

There are 0-3500 RPM and 0-5000 RPM tachometers available for the Model "A" supplied in a 6 Volt configuration. These units work with either positive or negative ground cars. These units are 2" in diameter.

The tachometer is made by the Westberg Manufacturing Company, located at 3400 Westach Way, Sonoma, CA 95476. The company has been in business since 1944 and provides a wide variety of instruments. Their web site is www.westach.com.

Samples of the face of each tachometer are shown below:

0-3500 RPM	0-5000 RPM
	
P/N 2CT32-6V, Price \$111	P/N 2CT52-6V, Price \$111

In addition to the tachometer there is a housing and light kit available. The housing is shown below:

If you want a tachometer for your Model "A" here is one available. I have no ties to this company. I just wanted people to know about them.
